

Doctoral studies in Finance

Do you want to take your finance knowledge to the next level? Do you want to solve and analyze financial issues? Thinking of an academic career? Or highly skilled career in the business world? You could be the next doctoral researcher in finance we are looking for. If you got high marks for your master's thesis in finance (or closely related fields like mathematics, economics, or statistics) and your grades are top of the line, you might be the person we are looking for.

University of Turku, UTU

The University of Turku is an international research university located in Turku, Finland, the happiest country in the world. UTU is an active academic community of 25,000 students and employees from over 100 different countries. As one of the leading research universities in Finland, the University of Turku offers study and research opportunities in seven faculties, one of which is Turku School of Economics. See [10 Best reasons to choose UTU](#).

Turku School of Economics

Turku School of Economics is part of the University of Turku and a tight-knit international community of 3,000 undergraduate and post-graduate students, 200 researchers and lecturers, and exchange students. We received [the AACSB accreditation](#) in 2019.

UTU Graduate School and the Doctoral Programme of Turku School of Economics

The Doctoral Programme of Turku School of Economics aims to train experts for the needs of businesses, society, and the academic community. It offers scientific researcher training to solve relevant, current, and anticipated problems related to business, economy, and society. The Doctoral Programme of TSE is a part of [the University of Turku Graduate School \(UTUGS\)](#). The University of Turku Graduate School (UTUGS) consists of sixteen doctoral programmes which cover all faculties and approximately 2,000 doctoral researchers of the University.

Department of Accounting and Finance

Department of Accounting and Finance at Turku School of Economics specializes in three subjects: Accounting and Finance, Business Law, and Quantitative Methods in Management. Head of the Department is [Professor](#)

[Luis Alvarez Esteban](#). Accounting and Finance is by far the biggest major at TSE in terms of B.Sc. and M.Sc. students. Due to its popularity, we have limited the intake to approximately 70 new B.Sc. and M.Sc. students each year.

We are one of the seven members of the [Graduate School of Finance](#) (GSF) – a joint Finnish nationwide doctoral program in finance. The main objective of GSF is to promote high-quality doctoral education in finance in Finland by organizing advanced level doctoral courses.

Turku School of Economics is also one of the thirteen members of the [Nordic Finance Network](#) (NFN) which was founded by the GSF. Nordic Finance Network (NFN) is a network for research and doctoral training in finance. The main objective of NFN is to promote Nordic doctoral education in finance. Both GSF and NFN organize seminars and workshops for the students of their member organizations as well as provide support for travel costs, external visits, and invited supervisors.

Doctoral Studies in Finance

The coursework consists of 60 ECTS credits of studies, which are in finance done mostly during the first year and a half. More information about the coursework can be found [here](#). The backbone of the studies are the 32 credits of doctoral studies in finance. In practice, students take (at least) five courses from the [curriculum](#) offered by the GSF. The GSF courses are highly demanding and they are thought by the world's best scholars. The courses offered by [the Nordic Finance Network](#) are also available. The remaining courses include general and elective courses, e.g., in econometrics or economics.

Interested?

Applications are accepted in Fall and Spring. The doctoral program is tuition free for all accepted applicants. Fall applications are also considered for funded positions (salary 100%) although the competition is fierce. If awarded, funding is provided up to four years (less time already financed through some other source). In most cases doctoral researchers finance their studies with financial support using research grants from various foundations.

The spring 2023 application period is 1. – 17.3.2023.

The Fall 2023 application period is 28.8. – 15.9.2023.
